Welcome to our world; Purplehaze Apps. For those of you wondering about the significance of the "power of 2", it underlies our belief in achieving exponential results with efforts of two like minded individuals. We have had a lot of fun building this from ground up and looking forward to more fun working on this venture. At Purplehaze, we continuously strive to get you applications which serve a purpose, and at the same time maintain the simple yet elegant interface you expect of anything associated with Apple.

"Power of 2"

The iPhone has changed our lives in more than one way, and it is our hope to make the iPhone experience an even better one, for our patrons. We know that the best way to come up with world class products is not only by our innovation, but also by listening to you. So please write in with your comments and thoughts on how we could improve our existing product line, or new ideas to help us grow and meet your expectations.

What's New

New Mystery Product... Soon

Just to give you a hint, it heavily uses bar code reader/generator. Its a game? Maybe... just a little while longer.

[Barcode Software developed by Softmatic](#)
Enigma 2 : Ad Infinitum. [Download](#)

This is an unique puzzle, like nothing you have come across. The game play involves getting to the next level. At each level, you can choose to use all the tools available to you, including browsing websites for clues. Get to the next level in whatever fashion, and try not to crack the stage using other's answers.

Song Pong. [Download](#)

A fun music game/music generator. It a novel concept and a plethora of possibilities to compose your repetitive tones for your compositions or just to impress your friends.

Xposure in App Store. [Download](#)

This application is a must have for all amateur to professional photographers. It includes an exposure guide, depth of field calculator, night camera, camera timer and array of image filters
